Basco Baltic OÜ

colorsphere
WORLD FULL OF COLORS

[Sergei Beluhhin, CEO](#)

<http://www.colorsphere.eu/>

info@colorsphere.eu

Company description: BASCO BALTIC is specialized in distribution of products used in plastic production manufacturing processes as well as their production and consulting on the issues of their potential use. Official representative of Romcolor / Global Colors Group in Baltic countries (Estonia, Latvia and Lithuania) + Scandinavia and specializes in the wholesale of dry and liquid colorants and additives (Antistatik, Slip, Dessicant, Antiperen ...), used in manufacture of plastic products, as well as advising on their potential use. Also Basco Baltic is offering a wide range of quality recycled raw materials.

Interested in: importing plastic raw material from Iran (LDPE, HDPE, PPR)

NORES PLASTIC

MEETING YOUR DEMAND

Company is dealing with **recycled plastics trade** - sourcing materials mainly from the Baltic States, Scandinavia and other European countries and exporting to customers in European Union or Asia.

Their suppliers are waste recycling or plastic manufacturing companies.

In the past 20 years they have worked with over 1000 different suppliers and customers in ca. 40 different countries and traded over 250.000 tons of plastic waste.

Main partners in Europe:

Riho Merila, Account manager

AGERA Trade

Company with business relations in EU hygiene sector and in Russian chemical industry.

Company with transit access channels via third countries.

Today we can offer...

DRINKING WATER, PIPES AND TANKS DISINFECTION

AQUA BLUE is superior and more effective than conventional water treatments, which use chlorine dioxide, thermal processes, or UV-light.

AQUA BLUE sustainably eliminates germs, viruses, fungi, spores, and all oxidizable hormone and antibiotic residues.

Just **0.1 %** AQUA BLUE gets your drinking water clean and fit for human consumption, keeping in accordance with the drinking water requirements.

TRACEABLE ROOMS DISINFECTION SYSTEM

Completely dry spray which can be used to disinfect all surfaces, leaving absolutely no residue. Each single spray bottle has unique QR code.

Every room, which will be disinfected will have unique QR sticker on wall. After room disinfection, the bottle QR will be scanned and also room QR. Now with every smart phone people can scan room QR code and they will receive info, when was the room last time disinfected.

This is unique disinfection which can be traced.

CHEMICAL RAW MATERIALS SUPPLY

Example high quality ethanol, which can be used to produce disinfection products.
